# **AN INTENTIONAL SPACE**

A place where we look after each other, creating a sense of community.

KEEP IT onehundredpersònt

KEEP IT onehundredpersònt

To do so we talk to everyone at the door, telling them our intentions for the space.

- **No picture policy [there will be a photographer]**
- **Consent is key**
- **Take care of each other > address or come to us**

This doesn't only show them there are holistic intentions bound to the space but also pull them out of their anonymity. One of the intentions is to keep an eye out for each other, this gives a sense of responsibility. We ask everyone who enters to keep an eye out for everyone on the dancefloor so if people are going against the rules, they can address that or go to the organizers at the bar.

In this social media climate, a picture can be more than just a picture. We want to take care of our closeted friends, people who sneak out of their parents' home, the ones who dress up for the party, etc. To make our guest feel at ease there is a no picture policy., but there will be a photographer > the choice is yours. Also keep your head in the party, it is important for the sense of community that we are all here!
